

Verdiseal

A waterproofing system designed for roof coatings

VERDISEAL SYSTEM OVERVIEW

A liquid spray applied, rapid curing system for buried waterproofing applications. The system combines a seamless coating with speed of application even at low temperatures.

Application Technique

Hand apply as thinly and as quickly as possible avoiding pooling using a short nap roller, squeegee, brush.

Product	Description	Minimum Coverage(kg/m2)	Pack Size(kg)	Nominal Area coated per kit (m2)
E4 Primer	Two component primer - formulated without solvent	0.25)	10	40
Verdiseal Membrane SG	Spray applied two component elastomer	2	420	210
Verdiseal Wearcoat	Solvent free two component wearcoat	0.6	15	25

FEATURES

- Quick, easy application especially around complex structures, for rapid return to service, without compromise on quality
- Light weight without the need for protection board
- Crack bridging ability (Elastomeric properties)
- 30 year warranty NDL warranty...
